EDUCATION

Shri Balasaheb Mane Shikshan Prasarak Mandal's Ashokrao Mane Group of Institutions
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.90

Kolhapur, India
Aug. 2023 – June 2027

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend Technologies: React.js, HTML, CSS, Tailwind CSS, Vite

Backend Frameworks: Node.js, Express.js, FastAPI, Flask, REST APIs, Socket.IO

Databases & Libraries: MongoDB, MySQL, Supabase, NumPy, Pandas, Scikit-learn, PyTorch

Tools and Platforms: Git, GitHub, AWS, VS Code, Jupyter Notebook, Postman, Vercel, Streamlit, ImageKit

Machine Learning and AI: Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Large Language Models, Transformers, Retrieval Augmented Generation, Prompt Engineering, OpenAI API

Computer Science Fundamentals: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability

EXPERIENCE

AI/ML & Python Full Stack Development

Jan 2026 – Present

EduSkills Foundation

Virtual

- Completed Python Full Stack Development, Google AI-ML, and Generative AI, Deep Learning & Language Models virtual internship programs through the AICTE–EduSkills initiative.
- Developed hands-on expertise in Python, FastAPI, Flask, RESTful APIs, Machine Learning, Deep Learning, Generative AI, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Prompt Engineering through project-based learning.
- Built and deployed AI-powered and full-stack web applications while gaining practical experience with NumPy, Pandas, Scikit-learn, PyTorch, OpenAI API, HTML, CSS, JavaScript, and modern software development practices.

PROJECT

Uber Clone | *React.js, Vite, Tailwind CSS, GSAP, Node.js, Express.js, MongoDB, Socket.IO, Google Maps API* | [Demo Video](#) | [Live Site](#)

May 2026

- Built a real-time ride-hailing app with OTP-secured rides, live fare estimates across ride types (UberGo, Moto, UberAuto), and smart matching that routes requests to the correct vehicle type.
- Used Google Maps Geocoding and Directions APIs for autocomplete pickup/drop search, live route drawing, and real-time ride status updates (Looking → Accepted → OTP Verified → Riding).
- Built a Captain dashboard with auto online/offline sync via Socket.IO, real-time ride alerts, an earnings tracker, and full ride history for both riders and captains.

RentConnect | *React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, ImageKit* | [Demo Video](#) | [Live Site](#)

June 2026

- Built a full-stack MERN rental platform connecting property owners and tenants directly, with smart search, geolocation-based nearby search, visit booking, favorites, and reviews.
- Implemented JWT refresh token rotation, role-based access for tenants/owners, and secure REST APIs with rate limiting and input validation.
- Added real-time chat via Socket.IO (typing indicators, read receipts) between tenants and owners, plus image uploads via ImageKit.
- Built Owner and Admin dashboards with listing analytics, verification, auto-expiry/renewal, and cascade-safe deletes across bookings and reviews.

SnapClass – AI-Powered Attendance | *Streamlit, Python, Flask, HTML, CSS, JavaScript, Supabase, Face and Voice Recognition* | [Demo Video](#) | [Live Site](#)

July 2026

- Built an AI attendance system using face recognition (dlib) and voice recognition (Resemblyzer) with QR-based subject enrollment.
- Used Supabase for authentication, real-time attendance storage, and a teacher review step before saving any results.
- Built a separate Flask, HTML, CSS, and JavaScript landing page, deployed independently on Vercel alongside the main Streamlit app.

AI Resume ATS Scorer | *Python, FastAPI, Streamlit, spaCy, Sentence Transformers, Groq (Llama 3), Supabase, WeasyPrint* | [Demo Video](#) | [Live Site](#)

May 2026

- Built a full-stack AI-powered resume screening platform that scores resumes against job descriptions using semantic similarity matching and NLP-based keyword analysis.
- Implemented resume parsing and ATS scoring logic using spaCy and Sentence Transformers, with LLM-generated improvement feedback powered by Groq (Llama 3).
- Integrated Supabase for user authentication and score history tracking, and WeasyPrint for exporting downloadable PDF score reports.
- Designed a decoupled architecture with a FastAPI backend for scoring/NLP logic and a Streamlit frontend for an interactive, user-friendly interface.

CERTIFICATES & ACHIEVEMENT

- Infosys Springboard:** Python, HTML5, CSS3, JavaScript, React.js, and Database Management System (DBMS) Certifications.
- HackerRank:** Python, CSS, JavaScript, SQL, React, Node.js, **Software Engineer Intern**, and **Software Engineer** Certifications.
- Earned 50+ professional certifications across Software & Full Stack Development, AI/ML, and Programming from leading learning platforms.
- State Finalist** in the **IndiaSkills Competition 2025–26** under the **Web Technologies** skill category.
- Built and deployed multiple **Full Stack** and **AI-powered applications** using the **MERN Stack**, **FastAPI**, **Flask**, and **OpenAI APIs**.
